Applied Linguistics Winter Conference 2024

09:00 AM - 01:00 PM EST

Multilingualism in an Era of Dislocation and Rapidly Evolving World

It has been an era of 'dislocation', a term drawn from the social science tradition (i.e., social dislocation where there is the loss and detachment from home and culture, and essentially significant facets of identity; see Alexander, 2000). In an era marked by unprecedented dislocation and interconnected global dynamics, the significance of multilingualism emerges as a crucial element in fostering understanding and bridging cultural gaps amidst the complexities of our rapidly evolving world. ALWC 2024 aims to create rich opportunities to share research, insights, and teaching practices with specific focus on opportunities and challenges that have been brought about by unfolding contemporary events leading to significant dislocation of various groups and populations.

Teacher Education SIG Journal Series

Zoom link will be emailed to registrants before the event

05:30 PM - 07:00 PM EST

Christian Perticone,
vpoutreach@nystesol.org

For this series of webinars, participants will engage in an interactive discussion on current and relevant publications in our field. In this first session, we will discuss Share's (2021) piece, "Is the Science of Reading just the Science of Reading English?" published in Reading Research Quarterly. In our discussion, we will consider points of intersection between Science of Reading and ELs. Those interested will be sent the article upon registration. The goal is to create a space where teacher educators can engage with research literature related to the academic success of MLLs in school.
