Virtual - a link will be sent to you the day before the event

The conference theme, "Responsible AI: Ethics and Pedagogy in TESOL," examines the critical intersection of artificial intelligence, ethical practice, and pedagogical innovation in Teaching English to Speakers of Other Languages (TESOL). This conference will explore how educators and researchers can harness AI technologies responsibly while maintaining ethical standards and pedagogical integrity. Attendees will engage with thought-leaders who will share frameworks for responsible AI integration, address concerns about equity and access, and envision a future where AI enhances rather than replaces the human elements of language teaching and learning.
